Health menu of massage

NECK

Apply weak vibration along neck contour. Use edge of the pad. Effective to relax stiff shoulder.

SHOULDER

Use pad surface and shiatsu knobs. Effective to relieve stiff shoulders. Also good for pain on back and waist. Apply weak vibration.

BACK

Use pad surface and shiatsu knobs. Apply weak vibration to massage from the spine to both sides. Good to ease back pain and stiff shoulders. Lie down on RELAXY upside down to get the maximum effect.

WAIST

A chair is helpful to massage waist as shown in the picture.

ABDOMEN

Apply weak vibration gently for a short time. Effective to improve circulation and to ease abdominal muscular pain.

ARM

Apply weak vibration. Good to relieve fatigue of arms and stiffness of shoulders.

CALF

Apply strong vibration to ease fatigue of legs and the whole body.

SOLE

Recommended for reflexological reasons. Apply strong vibration to improve circulation on legs and waist. Relieves fatigue of legs and eases neuralgic pain.

NAME OF PARTS

FEATURES

- LARGE PAD**...An anatomically designed large pad fits your body contour for effective all-over massage.
- ROUND HANDLE**...Designed to be securely handheld, it provides an extra massage feeling especially when someone helps apply it on torso areas. An assured stability for use upside down on the floor.
- SURE EFFECT**...An eccentric motion of the powerful motor of our own development gives comfortable, but sure stimulation.
- SHIATSU KNOBS**...You can enjoy finger pressure therapy called Shiatsu with large Shiatsu knobs. They are detachable and recommended for better effect.
- MESSAGE INTENSITY**...Massage speed is freely controlled by fingertip pressure to decide the intensity you like.
- STURDY CONSTRUCTION**...Constructed sturdily enough to support torso weight.
- QUALITY**...Care has been taken to ensure excellent performance and workmanship. No lubrication is necessary.

* SHIATSU: A type of massage in which pressure is applied to the same points of the body as in acupuncture.
